WHO WE ARE

Established in 2009, Zurmat Group pioneers the best services in the field of construction, Construction Material testing and Construction Engineering Consultants.

Operating out of a headquarters office located in Kabul Afghanistan, the company is comprised of a number of independent subsidiary companies specializing in construction, engineering, material testing, and project management. As a result of the synergistic efforts generated by the variety of expertise, the delivery of our final product delights our clients. Cooperating under a well-organized network of talent sharing within the group, the ultimate result is a “One Stop Shop” solution for all our customers' construction and engineering needs.

Quality, customer service, technical and manpower excellence are the keys to Zurmat Group success. Staffed with a strong national and international employee base, the group is prepared to take on all challenges. Constantly expanding in an ever-changing environment Zurmat Group goal is to actively participate in reconstructing the critical infrastructure of Afghanistan. In the

end, our aim is to improve the overall Afghans quality of life and help create sustained economic growth. Thanks to a secure base of satisfied clientele and increasing business opportunities, the company sustains excellence in quality by properly applying technological advancements in equipment and, through constant employee training and monitoring.

Working for the betterment and future of Afghanistan, our corporate giving through the corporate charity is another demonstration of our Corporate Philosophy. By taking a percentage of our corporate profits and reinvesting the money into the local communities, Zurmat Group is doing its part to support national recovery. Thru service projects, donations, and other charitable works, Zurmat Group wants to help improve the quality of life for every Afghans regardless of tribe, region or heritage.

MISSION STATEMENT

Zurmat Group's Mission is to provide professional excellence and quality service. Through constant market research, innovation, application of technological Advancements and the superior abilities of our manpower. The Zurmat Group Vision is to be a leading provider of international construction Services, management and engineering expertise. We will achieve our vision Primarily through the development, training and education of the Afghan nationals we employ. Our vision is to implement rehabilitation programs and improve the overall infrastructure development of Afghanistan as we contribute to the country's reconstruction and economic Growth.

Business Areas

The strength of Zurmat Group lies in its capability to provide diverse products and services in multiple businesses and industries ranging from Construction, to Material Testing Zurmat Group is continuing its growth and transformation with the advancement of expertise as its basis.

Some of our Services include:

General Contractor

Our many years of collective experience in construction management along with our careful selection of teaming partners ensures impressive general contractor management and, on time, cost effective management of client projects.

Design – Build Construction:

'Design — Build' is a term that is successfully meted to the field of construction for commercial projects. As the term suggest this approach brings the design and the construction side of engineering together under one management organization.

Construction

Zurmat Group has a wide range of services that come together to form a “one stop shop” solution for our Customer's construction and engineering needs. Quality in equipment, professional expertise, outstanding project management and overall excellence in customer service is of the utmost importance for every division within the group.

We have maintained a dedicated and satisfied client ele not only through the number and quality of services we provide, but also through trusted business relationships and the many positive returns on our investment in our people.

Material Testing

Zurmat Group Material Testing Laboratories start its operations in May 2008, ZMTL is the leading material Testing laboratory that provide services such as:

- Aggregate Tests
- Concrete & Cement Tests
- Masonry Tests
- Soil Tests
- Asphalt Tests
- Chemical Analysis
- Steel Tests
- Water Test
- Survey
- Geotechnical Engineering
- Sub-Surface Exploration
- Hydro Geological Assessment
- Calibration
- Polymers
- Foundry
- Paper
- Plup
- Cartons etc.

Our dedicated services in geotechnical engineering, soil testing, aggregate testing, concrete testing, cement testing, asphalt testing, and steel testing enabled Zurmat Group to gain market leadership in terms of standardized quality, customer services and contribution in the rehabilitation of Afghanistan.

Zurmat Group Material Testing Division with their standard equipped testing houses run by well-trained experienced and qualified technicians provides the much needed “on and off site” sampling, testing facility for Government of UAE, donor agencies, contractors and local companies.

Concrete

Zurmat Group offers clients comprehensive concrete testing- including on-site materials testing and inspection and engineering support.

Soils

Zurmat Group thoroughly tests structural soil fill. You can rely on Zurmat Group technicians to run thorough tests to determine maximum density, soil compaction, soil classification, and all other applicable characteristics.

Structural Steel

Zurmat Group engineers and technicians provide the most reliable consultations and quality control to assure the structural integrity of steel.

Nondestructive Testing

Zurmat Group offers a variety of nondestructive testing (NDT) services for welding inspections, including tests on structural steel, piping, and pressure vessels, and reinforcing steel and equipment.

Zurmat Group personnel have extensive experience in geotechnical services in the development of new and existing building projects.

Vision Statement

The Zurmat Group Vision is to be a leading provider of international construction services, management and engineering expertise. We will achieve our Vision primarily through the development, training and education of the Afghans nationals we employ. Our Vision is to implement rehabilitation programs and improve the overall infrastructure development of Afghanistan as we contribute to the country's reconstruction and Economic Growth.
